PROFILE

Final-year high school student in Romania, preparing for the Bacalaureat, with sustained programming experience since Grade 7. Built independent projects in educational AI and probability-based software, with particular interests in automation, cybersecurity, algorithmic thinking, and mathematically grounded problem-solving. Extracurricular experience includes student leadership and early international collaboration on security-related learning projects. Seeking to study Technical Computer Science and deepen my knowledge of secure systems, software engineering, and analytical computing.

EDUCATION

Colegiul National "Mihai Eminescu" - Romania

Grade 12 | *Bacalaureat expected 2026*

- Independent programming and project development since Grade 7.
- Academic focus on Mathematics, Informatics, and English; IELTS Academic 7.5 achieved.

SELECTED PROJECTS

BacTutor — *AI tutor for Romanian Bacalaureat preparation (in development)* [GitHub](#)

- Developing an AI-assisted study tool designed to support Romanian Bacalaureat preparation through clearer explanations and structured revision support.
- Applies software development to a real educational problem, showing initiative, self-directed learning, and user-focused thinking.
- Demonstrates interest in building useful systems that combine programming with practical learning outcomes.

Blackjack Card Counter — *probability and Hi-Lo based analysis project* [GitHub](#)

- Built a project that displays blackjack probabilities and uses the Hi-Lo algorithm to calculate the running count.
- Applied probability concepts and numerical reasoning to estimate outcomes and support data-driven decision-making.
- Shows curiosity for mathematically grounded software, algorithmic logic, and analytical problem-solving.

LEADERSHIP AND EXTRACURRICULAR ACTIVITIES

- Executive Secretary, School Student Council (Consiliul Elevilor) - supported student representation through organization, communication, and administrative coordination.
- Participant, Digital History Competition / Project - contributed to a project presenting history through digital media.

ADDITIONAL TECHNICAL EXPERIENCE

Flux-Security - *international beginner security project (2021-2022)* [Github](#)

- Collaborated with a Lithuanian teammate and learned database fundamentals, hashing, and core cybersecurity concepts.

SKILLS AND INTERESTS

Technical: Python, Git/GitHub, debugging, algorithmic problem-solving, project-based software development, database and hashing fundamentals

Interests: Automation, cybersecurity, applied probability, secure systems, Technical Computer Science

Strengths: Analytical thinking, logical reasoning, independent learning, student leadership, technical communication in English

LANGUAGES AND CERTIFICATIONS

Romanian: Native

English: IELTS Academic 7.5

Certifications: ECDL / ICDL Certificate
